MINERALS MARKETING
CORPORATION OF ZIMBABWE

ABOUT MMCZ

Zimbabwe’s exclusive minerals marketing agent

The Minerals Marketing Corporation of Zimbabwe was set up by the MMCZ Act [Chapter 21:04] and opened its doors on 7 March 1983. It is wholly owned by Government and falls under the Ministry of Mines and Mining Development.

1983

year MMCZ began operations

100%

owned by the Government of Zimbabwe

VISION

A prosperous economy premised on mineral resource accounting by 2030.

MISSION

To maximise returns to all our stakeholders through efficient marketing services and national mineral resource accounting.

MANDATE

What MMCZ does

Sole marketing and selling agent for all minerals produced in Zimbabwe, except gold and silver.

Market and sell
Sole agent for Zimbabwe’s minerals; buys and resells for its own account.

Study markets
Investigates marketing conditions at home and abroad.

Control exports
Exports go through, or with approval of, MMCZ.

Resource accounting
Verifies produced quantities and grades to curb leakages such as transfer pricing and under-declaration.

Add value locally
Encourages local beneficiation and value addition.

Advise Government
Advises on all matters relating to the marketing of minerals, and implements Government policy.

OUR VALUES

What we stand for

Fairness
Impartial and just treatment without favouritism or discrimination.

Accountability
Taking ownership of one’s responsibilities and actions.

Commitment
Dependability and passion for one’s job.

Integrity
Consistent and transparent high moral standards.

Innovation
Striving for continuous improvement.

Teamwork
Unity of purpose.

INVESTMENT CASE

Capital is moving

Investment extends beyond lithium: new licences, plant expansions and chemical conversion are under way across lithium, platinum, chrome and steel.

US$3.52bn

new mining licences issued since 2023

US$768.5m

mining investment approved in Q2 2026

US$1.8bn

PGM exports, Jan–Oct 2026

US$2.2bn

lithium exports, Jan–Oct 2026

Sources: Mining Weekly; ZIDA.

ABOUT MMCZ

The Minerals Marketing Corporation of Zimbabwe (Act, Chapter 21:04; operating since 1983) is the sole marketing and selling agent for minerals produced in Zimbabwe, except gold and silver.

HOW WE SUPPORT INVESTORS

- Market intelligence and price forecasting
- Buyer introductions, contracts and offtake
- Sampling, assay and valuation
- Export documentation and coordination
- Mineral accounting and traceability
- Advice to Government on mineral marketing

MINERALS MARKETING CORPORATION OF ZIMBABWE

INVESTMENT BRIEF 1 OF 5

Priority Mining Projects

Where capital is already at work in Zimbabwe

MINING OPPORTUNITIES IN ZIMBABWE

MINERALS MARKETING
CORPORATION OF ZIMBABWE

INVESTMENT OPPORTUNITIES

Opportunities

PGMs
Partnerships on new mines and brownfield expansions on the Great Dyke.

Lithium
Chemical conversion and contract processing for smaller producers.

Chrome
Ferrochrome smelting, toll furnaces and sintering, with captive power.

Exploration
Greenfield targets and re-evaluation of historic mines.

Small and medium-scale miners
Equity, equipment finance and offtake to expand operations.

Toll processing
Shared plants for coal, lithium, copper and tungsten.

Power and rail access shape project economics. MMCZ supports markets, valuation and offtake.

BATTERY MINERALS

Lithium projects

Arcadia, Goromonzi
Prospect Lithium Zimbabwe (Zhejiang Huayou Cobalt). About US$400m sulphate plant; first commercial exports April 2026, about 60% of capacity by July. Lithium carbonate unit targeted by end-2026.

Bikita Minerals
Sinomine. Lithium sulphate plant under construction; reported cost US$400m to US$500m.

Kamativi
Sichuan Yahua with the State. Sulphate plant announced in February 2026.

Sabi Star, Buhera
Chengxin Lithium and Canmax. US$77m acquisition in 2021, then US$130m for the mine and concentrator, completed 2023.

Industry commitment
About US$1.45bn committed by producers to local processing.

Sources: Equity Axis; SMM News; company announcements.

PLATINUM, CHROME, STEEL

Platinum and steel

Zimplats
Impala Platinum (87%). US$1.8bn programme; a US$360m, 38 MW smelter (July 2025) triples capacity to 380,000 t of concentrate a year. Solar: 35 MW built of 80 MW.

Karo Platinum
Tharisa (70%). About US$545m for 226,000 oz a year; first ore milling targeted for 2027.

Great Dyke Investments, Bravura
New PGM entrants at different stages of implementation.

Manhize steel
Dinson Iron and Steel (Tsingshan). About US$1.5bn; about 60% of capacity; US$205m steel exports, Jan–Oct 2026; about US$500m of imports saved.

Ferrochrome
Afrochine at Selous; Xintai's Palm River third furnace targeted for August 2026. Exports 304,639 t, Jan–Oct 2026.

Sources: Herald; Mining Index; Equity Axis; company statements.

INVESTMENT CASE

A major supply base

Zimbabwe has declared its priority minerals and set conditions on ownership, rights and processing that investors should plan for.

About 9%

of global lithium supply

8

minerals declared critical

US$1.8bn

PGM exports, Jan–Oct 2026

550 km

Great Dyke: PGMs, chrome and nickel

Source: Equity Axis.

ABOUT MMCZ

The Minerals Marketing Corporation of Zimbabwe (Act, Chapter 21:04; operating since 1983) is the sole marketing and selling agent for minerals produced in Zimbabwe, except gold and silver.

HOW WE SUPPORT INVESTORS

- Market intelligence and price forecasting
- Buyer introductions, contracts and offtake
- Sampling, assay and valuation
- Export documentation and coordination
- Mineral accounting and traceability
- Advice to Government on mineral marketing

TALK TO US

Address: 90 Mutare Road, Msasa, Harare

Website: www.mmcz.co.zw

MMCZ does not grant mining titles or investment approvals. Titles and approvals: Ministry of Mines and Mining Development. Registration: ZIDA.

MINERALS MARKETING CORPORATION OF ZIMBABWE

INVESTMENT BRIEF 2 OF 5

Critical Minerals

Lithium, platinum group metals, chrome and more

MINING OPPORTUNITIES IN ZIMBABWE

MINERALS MARKETING
CORPORATION OF ZIMBABWE

INVESTMENT OPPORTUNITIES

By mineral

Lithium
Concentrate upgrading, sulphate and carbonate plants; power and water for processing sites.

PGMs
Mine expansion, concentrators, smelting, base-metal refining and recycling.

Chrome
Ferrochrome, charge chrome and stainless-steel inputs; supply to Manhize.

Nickel, copper, cobalt
Great Dyke by-products and projects; battery and EV demand.

Graphite, rare earths
Exploration and early-stage partnerships; higher risk, higher reward.

MMCZ markets these minerals and verifies grade and value through its inspectorate.

DECLARED PRIORITY MINERALS

Critical minerals

- Lithium
- Platinum group metals
- Cobalt
- Nickel
- Graphite
- Copper
- Rare earths
- Chrome

Strategic minerals

- Diamonds
- Coal
- Iron ore
- Oil and gas

Lithium
Africa’s largest producer; about 9% of global supply.

PGMs
US$1.8bn, Jan–Oct 2026 (matte US$1.31bn, concentrates US$491m).

Source: Equity Axis.

FRAMEWORK

What to plan for

State participation
Minimum state shareholding in critical mineral extraction through special purpose vehicles.

Mining rights
Ministerial approval for rights over critical minerals.

Chrome titles
Titles above 100 hectares reported to be tied to local beneficiation.

Workforce
Local workforce expectations form part of the framework.

Confirm current terms with the Ministry of Mines and ZIDA.

INVESTMENT CASE

Value is moving upstream

Beneficiation is the policy priority under NDS2 and Vision 2030. The PGM sector shows the model; industry is applying it to lithium, chrome and steel.

18%

rise in PGM matte export value, Jan–Oct 2026 on 2025

US$1.45bn

committed by lithium producers to local processing

344,000 t

annual lithium sulphate in industry plans for 2030

US$500m

of steel imports saved by Manhize (reported)

Source: SMM News (producer plans, not confirmed output).

ABOUT MMCZ

The Minerals Marketing Corporation of Zimbabwe (Act, Chapter 21:04; operating since 1983) is the sole marketing and selling agent for minerals produced in Zimbabwe, except gold and silver.

HOW WE SUPPORT INVESTORS

- Market intelligence and price forecasting
- Buyer introductions, contracts and offtake
- Sampling, assay and valuation
- Export documentation and coordination
- Mineral accounting and traceability
- Advice to Government on mineral marketing

MMCZ does not grant mining titles or investment approvals. Titles and approvals: Ministry of Mines and Mining Development. Registration: ZIDA.

MINERALS MARKETING CORPORATION OF ZIMBABWE

INVESTMENT BRIEF 3 OF 5

Mineral Beneficiation

Moving from ore to higher-value products

MINING OPPORTUNITIES IN ZIMBABWE

MINERALS MARKETING
CORPORATION OF ZIMBABWE

INVESTMENT OPPORTUNITIES

Where to invest

Northern Battery Minerals zone
Regional hub for battery-mineral investors with shared infrastructure.

Midlands Metallurgical zone
Regional hub for metallurgical investors with shared infrastructure.

Toll processing
Shared plants for coal, lithium, copper and tungsten.

Chrome
Toll treating furnaces and toll sintering plants.

Dumps and tailings
Retreatment of residual value, backed by the new Mines Bill.

Engineering and equipment
Technical partnerships for smelters and refineries.

PATHWAYS

Ore to value

Lithium
Concentrate → sulphate → carbonate. Arcadia operating; Bikita and Kamativi in development.

PGMs
Concentrate → matte → refined metals. Zimplats smelter expanded; a base-metal refinery is being refurbished at Selous.

Chrome
Ore → ferrochrome → stainless inputs. Captive power required.

Iron ore and coal
Ore and coking coal → iron, steel, coke. Manhize operating; coke made at Hwange.

Other minerals
Diamond cutting and polishing; phosphate to fertiliser.

ENABLERS

What makes it work

Reliable power
Smelting is energy-intensive; power cost and reliability drive returns.

Rail and logistics
Access to ports and markets.

Long-tenor finance
Project finance up to seven years in some mining cases.

Market access
MMCZ offtake support and market intelligence.

INVESTMENT CASE

Capacity is growing

Mining and beneficiation depend on power, transport and water. Captive power, rail concessions and border PPPs are the main entry points.

2,962 MW
installed generation capacity

1,500 MW+
mining demand expected within 12 months

+600 MW
from Hwange Units 7 and 8

US$533m
rail deal being finalised

Sources: Herald; Mining Index; Southern African Times.

MINERALS MARKETING
CORPORATION OF ZIMBABWE

INVESTMENT BRIEF 4 OF 5

Infrastructure for Mining

Power, rail, border logistics and water

MINING OPPORTUNITIES IN ZIMBABWE

MINERALS MARKETING
CORPORATION OF ZIMBABWE

INVESTMENT OPPORTUNITIES

Partnership routes

Water
Supply, treatment and reticulation for mines and processing plants.

Services
Bonded storage, logistics, tailings and waste recovery.

Independent power producers
Power for chrome smelters and sintering plants.

Entry routes
Concessions, PPPs, service contracts and private generation.

Investor checklist
Locate processing near rail and power; plan captive supply; confirm rail status with NRZ.

POWER

Power supply

Capacity
Installed 2,962 MW: Kariba 1,050; coal 1,680; small hydro, bagasse and solar 232. Generation was 1,589 MW on 30 May 2026.

Mining demand
From about 1,000 MW to over 1,500 MW within 12 months (Chamber of Mines).

Captive and solar
2026 own-consumption licensing rules; large miners had until 2026 to build own generation. Zimplats: 35 MW solar built toward 80 MW.

Independent producers
Over 600 MW under construction.

Hwange
Units 7 and 8 added 600 MW; a 400 MW, US$455m expansion under a 15-year concession.

RAIL AND BORDERS

Moving minerals

Rail
US$533m China Railway deal being finalised, starting with a Beitbridge–Harare line.

Corridors
Grindrod's BBR runs Gwanda–Beitbridge; NRZ links to Mozambique via Chicualacuala.

Rail strategy
Involves 11 private companies; mining firms are partners in revival of Hwange–Bulawayo–Gweru.

Borders
Beitbridge upgraded (about US$300m); Chirundu 20-year concession reached financial close in September 2026.

Financing
Resource-linked debt being explored for roads and rail.

Source: press reports. Confirm with NRZ and the Ministry of Transport.

INVESTMENT CASE

Support in one place

Investor services sit under one agency, complemented by a sovereign investment fund, special economic zones and bank project finance.

US$1.59bn

investment approved in Q2 2026

US$768.5m

of it in mining

30+

state enterprises under the Mutapa Investment Fund

US$1bn+

Mutapa 2026 deal pipeline

INVESTMENT BRIEF 5 OF 5

Investment Facilitation

How investors are supported from licence to market

MINING OPPORTUNITIES IN ZIMBABWE

MINERALS MARKETING
CORPORATION OF ZIMBABWE

INVESTMENT OPPORTUNITIES

Opportunities

Exploration and brownfields
Joint ventures, earn-in and farm-in, or funding linked to offtake; restart partnerships on historic mines.

Small and medium-scale miners
Equity, equipment and working-capital finance, with offtake.

Infrastructure
Electricity, water, roads and rail sidings through private investment, service contracts and eligible PPPs.

Processing
Toll plants (including chrome toll furnaces and sintering), dump retreatment and beneficiation plants: greenfield, joint venture or build-operate.

Laboratories and traceability
Technical partnerships and equipment supply; accredited verification.

Marketing
Offtake and supply agreements through MMCZ.

GOVERNMENT AND CAPITAL

Support and capital

ZIDA One Stop Investment Services Centre
Guides investment licensing and coordinates engagement with relevant ministries and agencies.

ZIDA mining matchmaking
Connects investors with mining claim holders and potential local partners.

Ministry of Mines and Mining Development
Mineral titles, geological information and mining approvals.

MMCZ
Market intelligence, buyer engagement and marketing advice within its mandate.

Mutapa Investment Fund
Holds 30+ state enterprises including mining and railway assets; 2026 pipeline above US$1bn.

Banks and trade finance
Project finance for mines, plants and smelters; guarantees, letters of credit and working capital.

Source: Mutapa Investment Fund.

PATHWAY

Your pathway

1. **Define:** mineral, stage of investment and partnership model
2. **Diligence:** technical, legal, environmental and commercial
3. **Register:** through ZIDA's One-Stop Investment Services Centre
4. **Approvals:** titles and approvals from the Ministry of Mines, including state-participation and beneficiation requirements
5. **Market:** specifications, pricing benchmarks and offtake with MMCZ
6. **Build:** arrange power, logistics and finance

BUYER'S GUIDE

Secure supply through one agent

MMCZ is the sole marketing and selling agent for minerals produced in Zimbabwe, except gold and silver. Buyers deal with one agency that also verifies grade, weight and value.

US$2.2bn

lithium exports, Jan–Oct 2026

US$1.8bn

PGM exports, Jan–Oct 2026

304,639 t

ferrochrome exported, Jan–Oct 2026

About 9%

of global lithium supply

Source: Equity Axis.

ABOUT MMCZ

The Minerals Marketing Corporation of Zimbabwe (Act, Chapter 21:04; operating since 1983) is the sole marketing and selling agent for minerals produced in Zimbabwe, except gold and silver.

HOW WE SUPPORT BUYERS

- Buyer introductions, contracts and offtake
- Market intelligence and price information
- Sampling, assay and valuation
- Export documentation and coordination
- Mineral accounting and traceability
- Product availability and delivery planning

MINERALS MARKETING CORPORATION OF ZIMBABWE

BUYER GUIDE

Buy Zimbabwean Minerals

One verified route to supply

MINING OPPORTUNITIES IN ZIMBABWE

MINERALS MARKETING
CORPORATION OF ZIMBABWE

WHAT IS AVAILABLE

Our minerals

Lithium
Spodumene concentrate and lithium sulphate; lithium carbonate planned. Zimbabwe supplies about 9% of world lithium.

Platinum group metals
Concentrate and matte from the Great Dyke; refined metal capacity under development.

Chrome
Ferrochrome and charge chrome; 304,639 t of ferrochrome exported, Jan–Oct 2026.

Steel and iron
Steel billets and iron products from the Manhize plant, with steel exports of US$205m, Jan–Oct 2026.

Other minerals
Nickel, copper, coal and coke, graphite, tin, tungsten and diamonds.

WHAT TO TELL US

Your requirements

Tell us early so that MMCZ can match your needs to producers and confirm availability:

Product and specification
Mineral, form (ore, concentrate, matte, chemical or metal) and grade, with limits on impurities.

Quantity and schedule
Tonnage per shipment, annual volume and delivery dates.

Contract type
Spot sale, term contract or offtake linked to project finance.

Delivery terms
Incoterm, port of loading or discharge, packing and shipping.

Quality and payment
Sampling and umpire assay terms, payment terms and security.

HOW TO BUY

Buying through MMCZ

1. **Enquire:** send your requirement to MMCZ
2. **KYC:** MMCZ verifies the buyer first: company registration, beneficial owners, end use and destination, bank references and sanctions screening
3. **Match:** MMCZ identifies producers and confirms availability
4. **Contract:** price basis, volumes and terms agreed through MMCZ
5. **Verify:** sampling, assay, weighing and valuation by the inspectorate
6. **Export:** documents prepared and shipment coordinated
7. **Settle:** payment and mineral accounting records completed

Ask MMCZ to confirm the product forms available.

INVESTMENT CASE

From concentrate to chemicals

Zimbabwe is Africa’s largest lithium producer. Capital is now needed to complete and expand sulphate and carbonate plants and to move toward battery-grade materials.

About 9%

of global lithium supply

US$1.45bn

committed by producers to local processing

US$2.2bn

lithium exports, Jan–Oct 2026

344,000 t

sulphate a year planned by 2030

Sources: Equity Axis; SMM News. Producer plans, not confirmed output.

LITHIUM END PRODUCTS

Lithium End Products

Investing in the next stage of Zimbabwe’s lithium industry

MINING OPPORTUNITIES IN ZIMBABWE

MINERALS MARKETING
CORPORATION OF ZIMBABWE

INVESTMENT OPPORTUNITIES

Opportunities

Lithium sulphate
Complete and expand sulphate plants beside the mines; Bikita is under construction and Kamativi was announced in February 2026.

Lithium carbonate
Arcadia's unit is targeted by end-2026; room for carbonate capacity at other producers.

Battery-grade chemicals
Further processing toward battery-grade chemicals and precursor materials, a longer-term step.

Contract processing
Conversion capacity for smaller producers who cannot build their own plants.

Plant support
Power, water, reagents, engineering and logistics for conversion plants.

Offtake-linked finance
Prepayment and pre-export finance against agreed volumes of sulphate and carbonate.

WHAT IS ALREADY BUILT

Projects under way

Arcadia, Goromonzi
Prospect Lithium Zimbabwe. About US$400m sulphate plant; first commercial exports April 2026; about 60% of capacity by July.

Bikita Minerals
Sinomine. Sulphate plant under construction; reported cost US$400m to US$500m.

Kamativi
Sichuan Yahua with the State. Sulphate plant announced February 2026.

Industry commitment
About US$1.45bn committed by producers to local processing, with about 344,000 t a year of sulphate planned by 2030.

Market
Lithium exports of US$2.2bn, Jan–Oct 2026; about 9% of world supply.

Sources: company statements; press. Bikita cost reported between US$400m and US$500m.

ENABLERS

Making it work

Power
Installed capacity 2,962 MW; mining demand rising above 1,500 MW. Own-consumption licensing allows captive generation.

Markets
MMCZ provides buyer introductions, price information, valuation and offtake support.

Approvals
Ministry of Mines for titles and approvals; ZIDA One-Stop Centre for registration and licensing.

Hubs
Investors are directed to regional hubs such as the Northern Battery Minerals zone, sharing infrastructure.

Terms and approvals are agreed with producers and Government case by case.

MINERALS MARKETING
CORPORATION OF ZIMBABWE

BUYERS AND STRATEGIC PARTNERS

Zimbabwe minerals for global buyers

MMCZ is the sole marketing and selling agent for minerals produced in Zimbabwe, except gold and silver. One agent, one verified route to supply.

About 9%
of global lithium supply

US$1.8bn
PGM exports, Jan–Oct 2026

304,639 t
ferrochrome exported, Jan–Oct 2026

We are looking for buyers, strategic partners for markets and production, and pre-financing partners.

Source: Equity Axis.

WHAT IS AVAILABLE

Minerals available to buyers

Lithium
Spodumene concentrate; lithium sulphate; carbonate planned.

Platinum group metals
Concentrate and matte.

Chrome
Ferrochrome and charge chrome.

Iron and steel
Steel billets and iron products.

Nickel, copper and graphite
Battery and industrial minerals.

Coal and coke
Coal and coke.

Diamonds, caesium, tantalite
Rough diamonds and gemstones; caesium and tantalite concentrates.

LITHIUM

From concentrate to end products

Spodumene concentrate
Producing today; offtake and term contracts available.

Lithium sulphate
Starting up: Arcadia exporting since April 2026; Bikita under construction; Kamativi announced February 2026.

Lithium carbonate
Upcoming: Arcadia unit targeted by end-2026. Early offtake positions can be discussed now.

Battery materials
Longer term: precursor and cathode materials.

Timing is indicative and depends on each producer.

MINERALS MARKETING
CORPORATION OF ZIMBABWE

BUYERS AND STRATEGIC PARTNERS

What buyers receive through MMCZ

Single window
One agency from enquiry to shipment.

Buyer onboarding (KYC)
Company registration, beneficial owners, end use, bank references and sanctions screening.

Verified quality
Sampling, assay, weighing and valuation by the inspectorate.

Market intelligence
Price information and forecasts.

Contracts and offtake
Spot, term and offtake arrangements.

Export coordination
Documents, logistics and mineral accounting.

PARTNERSHIPS SOUGHT

Seeking buyers and strategic partners

Further processing
Complete and expand sulphate plants; carbonate capacity; battery-grade chemicals.

Markets
Buyers and strategic partners for the new products; joint market development.

Attractive offtake
Long-term offtake at agreed prices.

Production pre-financing
Prepayment and pre-export finance against agreed volumes, repaid in product.

MMCZ coordinates offtake, price basis, verification and accounting. Terms are agreed case by case, subject to Ministry of Mines approvals.

HOW TO ENGAGE

Next steps

1. Express interest
State mineral, volume and partnership sought.

2. KYC and due diligence
Buyer and partner verification.

3. Commercial discussion
Specification, volumes, price basis, delivery terms.

4. Agreement
Offtake or partnership, with producers.

5. Delivery
Verification, export documents and settlement.
